Education

POST-BACCALAUREATE	Computing Studies and Information Systems - Major in Emerging Technology (<i>Honour Roll, Dean's List</i>) Douglas College, British Columbia, Canada
BACHELOR DEGREE	Fine Arts and Design - Major in Advertising Arts (<i>Dean's List</i>) University of Santo Tomas, Manila, Philippines

Professional Experience

Front-End Software Engineer *Optix Inc | Nov 2022 - Current*

Implemented rich UX front-end web features of an award-winning Coworking management app.

Projects: Automation builder, Advanced inbox and messaging features, Dynamic / conditional pricing, Settings dashboard UI overhaul, Users and teams account panel

- Spearhead the front-end initiatives of all incoming features. Collaborate closely with our head-of-product, back-end developers, and designers to build exceptional features and experiences
- Utilise both Angular and Vue.js simultaneously. Using Angular, maintained and improved the existing platform. Using Vue.js, introduced new features and migrated existing features.
- Align UI modules with back-end technical specifications. Ensure data schema are seamlessly accommodated / integrated between back-end and front-end (GraphQL and Laravel)
- Use multiple version control services (Github, Gitlab) with CI/CD pipelines for separate repositories to collaborate. Use Jira and Confluence to plan efficient sprints managing features, defects, and backlogs
- Actively resolve or troubleshoot bugs across both back-end and front-end systems. Assist in QA and verifying back-end functionality.
- Optimise front-end to mimic the illusion of fast response time by using advanced techniques (caching / local browser storage, lazy loads, web sockets, pre-fetching)
- Develop delightful user experience through applied knowledge of UX principles

Front-End Developer *Beautiful Company GmbH, Trickle.app | Dec 2019 - Aug 2022*

Built and maintained features for Trickle.app, an online learning platform.

Projects: Advanced rich-text editor, Step-by-step dynamically updating modals

- Implemented pixel-perfect UI/UX Figma layouts. Ensured mobile-responsiveness and cross-browser compatibility
- Developed dynamic front-end features using Javascript. Migrate codebase from jQuery to Vue2 to Vue3 with Typescript
- Used GitHub for collaboration and version control. Apply working knowledge of command-line utilities, build tools, and branching strategies
- Demonstrated strong Javascript and PHP skills. Experience with CSS pre-compilers such SASS / SCSS and Webpack

Freelance Web Developer & Designer *Webcrafterinc.com | Sep 2017 - Nov 2019*

Built websites for businesses in industries such as logistics, legal, luxury, architecture / construction, and publication. Implemented strong online presence from ground up

WEB DEVELOPMENT; BRANDING AND UI/UX DESIGN

- Developed well-structured, user-friendly websites using PHP (WordPress) and JavaScript (React), customizing themes and handling deployment, hosting, and troubleshooting
- Designed and implemented e-commerce solutions, custom dashboards, and animations to meet client operational needs.
- Created branding kits through a structured process: research, mood-boarding, iteration, and refinement.

LEADERSHIP AND PROJECT MANAGEMENT

- Defined client vision, structured deliverables and timelines, and coordinated outsourced teams for on-time project delivery.
- Design digital marketing strategy utilising SEO optimization, social media presence, and online ads

Digital Programs Lead (Web Developer & Designer) *ASPACE Philippines | Leading Coworking in Philippines | Jan 2016 - Sep 2017*

Managed the evolution of our digital channels. Designed programs to integrate online services and website to operations.

WEBSITE DEVELOPMENT

- Developed & maintained official website (WordPress) enabling bookings, purchases, event registration, payments, chat support, and promotions
- Designed web layouts, templates, and features. Applied design system and consistent use of brand guidelines.
- Implemented scalable event registration systems, including the ASEAN Startup Awards (1,000+ attendees across Asia)

LEADERSHIP, SYSTEMS, AND PROJECT MANAGEMENT

- Led the evolution of digital channels, integrating online services with operations.
- Guided a 20+ person team across four departments in adopting digital tools for marketing, communications, and community engagement.
- Optimized workflows using WooCommerce, Checkfront, Capsule CRM, MailChimp, Zapier, HootSuite, Google Ads, and more.
- Trained teams and established procedures to maintain accurate data across four locations.
- Secured top ranking by applying SEO best practices and handling load speed score, keyword research, linking strategies, etc
- Launched digital marketing programs via social media, partnerships, and paid ad campaigns. Tracked using Google analytics and other systems.
- Organized and hosted HackerNest Manila, a leading tech community meetup.

Digital Marketing Manager *Gambit Technologies | WordPress Plugin Company | Sep 2017 - Sep 2018*

Directed company's marketing program and online campaigns promotions, etc. Handled social media, analytics, online ads, and email marketing.

Senior UI / UX Designer *RMDC | Integrated Digital Marketing Firm | Nov 2014 - Dec 2015*

Designed responsive interface for clients. Designed branding and all marketing materials. Trained incoming designers.

Senior Web Designer *MetroDeal.com | #1 Group-buying E-commerce in Philippines | Dec 2011 - Mar 2014*

Designed mobile application. Lead design of all client-facing visuals including interface of e-commerce website. Facilitated all campaigns.

Web & Design Specialist *Barefoot Investments / Little Green Hub | Serviced Office | Aug 2010 - Nov 2011*

Handled company website. Oversaw company branding and collaterals for web and print. Coordinated with client and third party services. Implemented campaigns and marketing materials using websites or online ads.
