Professional Experience

Front-End Software Engineer *Optix Inc | Nov 2022 - Current*

Implement and improve front-end of new and pre-existing web features of a world-class award-winning Coworking management app.

- Responsible for building, improving, and maintaining rich UX features
- Collaborate closely with our head-of-product and bright team of back-end developers to build exceptional features and experiences
- Utilize both Angular and Vue.js simultaneously. Introduced new features and migrated existing features using Vue.js. Maintained and improved the existing platform using Angular
- Align UI modules with back-end technical specifications. Ensure data schema are seamlessly accommodated / integrated between back-end and front-end (GraphQL and Laravel)
- Use multiple version control services (Github, Gitlab) with CI/CD pipelines for separate repositories to collaborate. Use Jira and Confluence to plan efficient sprints managing features, defects, and backlogs
- Optimise front-end to mimic the illusion of fast response time by using advanced techniques (caching / browser storage, lazy loads, web sockets, pre-fetching)
- Develop delightful user experience through applied knowledge of UX principles

Front-End Developer *Beautiful Company GmbH, Trickle.app | Dec 2019 - Aug 2022*

Built and maintained features for Trickle.app, an online learning platform.

- Developed dynamic front-end features for backend data using Javascript
- Successfully migrated the codebase from jQuery to Vue2 and later to Vue3 + Typescript
- Implemented pixel-perfect mobile-responsive UI/UX Figma layouts
- Used GitHub for collaboration and version control. Gained working knowledge of command-line utilities, build tools, and branching strategies
- Demonstrated strong Javascript skills. Experience with CSS pre-compilers such SASS / SCSS and Webpack

Freelance Web Developer & Designer *Sep 2018 - Nov 2019*

Built well-structured, visually-appealing, user-friendly websites for businesses in industries such as logistics, legal, luxury, architecture / construction, and education publication.

WEBSITE DEVELOPMENT

- Help clients grow their new or pre-existing businesses by setting up strong online presence through well-planned websites supported by a digital marketing strategy
- Developed websites using PHP (Wordpress) or Javascript (React). Customized premium themes. Deployed, hosted, and troubleshoot
- Implement tailored features such as e-commerce, customized dashboards, animation, SEO optimization

MANAGEMENT

- Explored client goals and expectations. Structured deliverables & timelines accordingly. Ensured consistent communication with clients. Directed outsourced resources to finish project on time.

Digital Programs Lead (Web Developer) *ASPACE Philippines | Leading Coworking in Philippines | Jan 2016 - Sep 2017*

Managed the evolution of our digital channels. Designed programs to integrate online services and website to operations.

WEBSITE DEVELOPMENT

- Developed and maintained official website using WordPress
- Implemented features enabling customers to: book spaces, buy products, register to events, make payments, enjoy promos, chat with live support, etc. Deployed booking system for different venues / products (office space, event venues)
- Enforced registration and payment system to handle events of different sizes (from small events to international conferences)

SYSTEMS

- Lead team use of digital toolkits for marketing, communications, and community (e.g. Checkfront, Capsule CRM, MailChimp, Zapier, HootSuite, Facebook / Google Ads, and more)
- Trained all the departments on usage and best practices of digital platforms. Set up procedures to ensure data is updated across all 4 branches

EVENTS AND DIGITAL MARKETING

- Secured top ranking by strategizing and applying SEO best practices
- Enabled and tracked all online marketing campaigns using social media channels, partnerships with other websites, paid ads, and analytics.
- Organized and hosted regular tech community meet-up: HackerNest Manila

Digital Marketing Manager *Gambit Technologies | WordPress Plugin Company | Sep 2017 - Sep 2018*

Directed the company's marketing program. Authored market research. Orchestrated online campaigns for product launches, promotions, etc. Handled social media, analytics, online ads, and email marketing.

Senior UI / UX Designer *RMDC | Integrated Digital Marketing Firm | Nov 2014 - Dec 2015*

Designed responsive interface for clients. Collaborated with developers and writers to create intuitive, user-friendly websites. Designed branding and all marketing materials. Trained incoming designers.

Senior Web Designer *MetroDeal.com | #1 Group-buying E-commerce in Philippines | Dec 2011 - Mar 2014*

Designed all client-facing marketing including interface of e-commerce website. Designed mobile application. Facilitated all daily promotions and campaigns.

Web & Design Specialist *Barefoot Investments / Little Green Hub | Serviced Office | Aug 2010 - Nov 2011*

Oversaw company branding and collaterals for web and print. Coordinated with client and third party services. Implemented campaigns and marketing materials using websites or online ads.
